International:
New challenges
New working environments
Flexible design

Convincing performance on three levels

1

Smart resource management

Our web-based software enables efficient booking and management of all resources in your company – from rooms and workstations to vehicles, parking spaces and other services. This allows you to maintain an overview at all times and maximise resource utilisation.

2

Efficient workflow support

In addition to a user-friendly booking experience, the primary focus is on optimising internal workflows. Our system seamlessly supports all administrative processes within your locations, enabling your teams to collaborate efficiently and your resources to be used optimally.

3

Extensive complementary services

We offer numerous add-on modules to optimise your business processes, including an administration module, cost allocation (SAP), booking and statistics exports, displays, kiosk systems, and integration with Outlook and single sign-on (SSO). These functions can be flexibly integrated into your infrastructure.

Frank Dippel, CEO Gingco Systems GmbH

Future-proof solutions

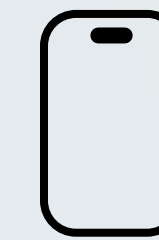

Room/workplace booking

Our software combines efficient conference management and intelligent desk sharing in one system. Tried and tested in years of practical experience, developed with specialists from all across the property industry.

Microsoft integration

The simple and secure integration of our strong booking logic into your existing groupware guarantees your employees intuitive operation and ensures maximum user satisfaction.

Mobile application

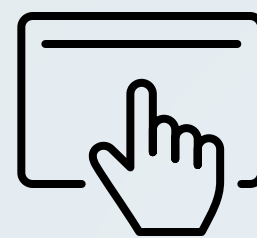

The easy integration of smartphones into your customised booking concept is standard for us: QR code scan, NFC authentication and open APIs included.

Future-proof solutions

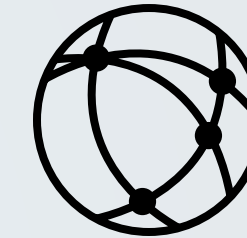

Administration/ Management

From ordering to billing, from visitor registration to car park management: our comprehensive management tools provide you with reliable support in all areas of property operations.

Displays/ Kiosk systems

Welcome screens, electronic door signs and interactive terminals are important components of modern building planning. Gingco Share supports all different kinds of manufacturers and existing systems.

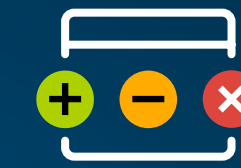

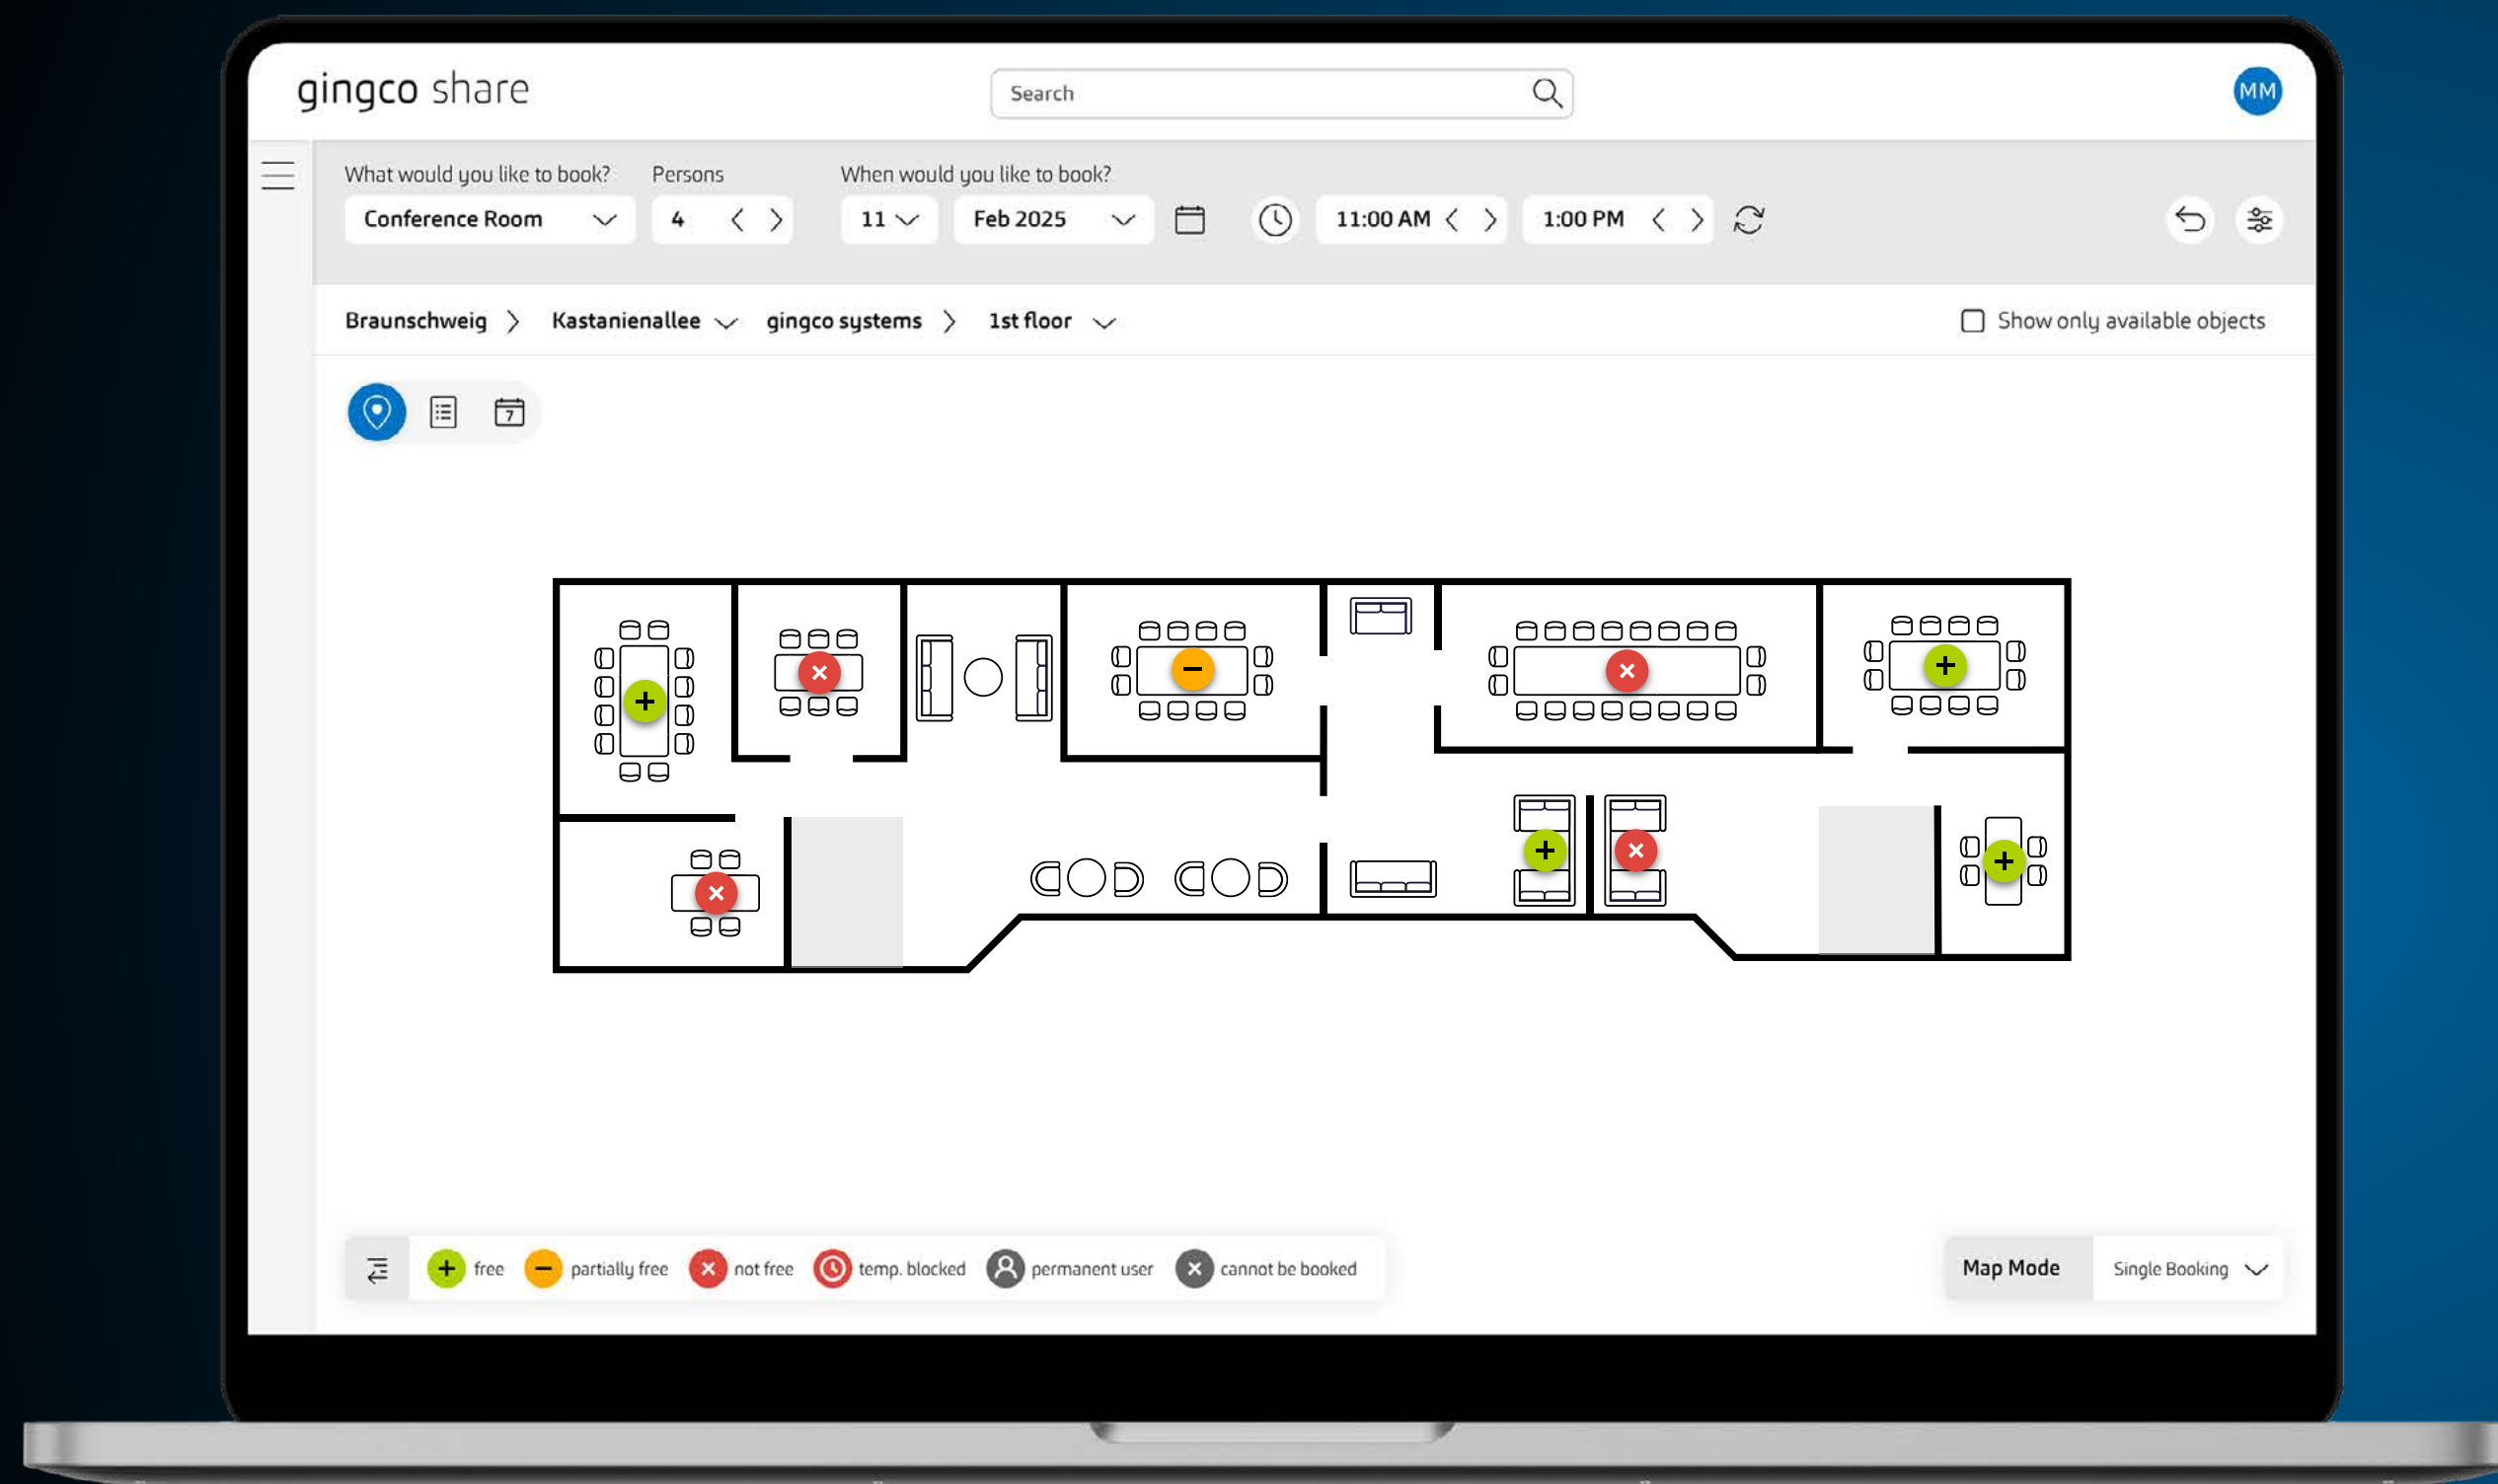

Operation/ Technology

You decide where our software is hosted and where your data is securely stored. We offer you the optimum solution for all requirements: whether on-prem or SaaS.

A modern office interior featuring a long, light-colored wooden conference table with several black chairs. Three large, circular pendant lights hang from the ceiling. The room has floor-to-ceiling windows on the left side, offering a view of other buildings. On the right, there is a dark wall with built-in shelves holding small plants and objects. A black pillar stands near the windows. On the table, there are three potted plants, a pen holder with colorful pens, and a black remote control.

Room booking

Intuitive web-based booking interface

Use our self-explanatory colour coding.

Three distinct views

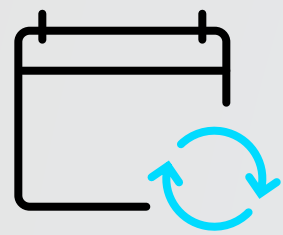

Optimise your booking experience with detailed overviews that show you the availability of all properties at a glance.

Extensive search parameters

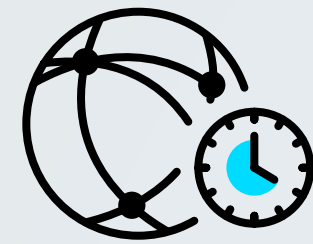

Various search options help you to find the perfect room that meets your requirements.

Room booking

Single appointment or recurring booking?

No problem – Reserve your resources just the way you prefer.

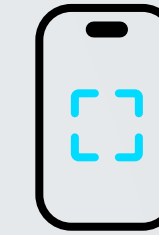

Cross-time-zone booking

Do you need two meeting rooms in different parts of the world? We support room bookings in different time zones.

Ad hoc booking on the touch display

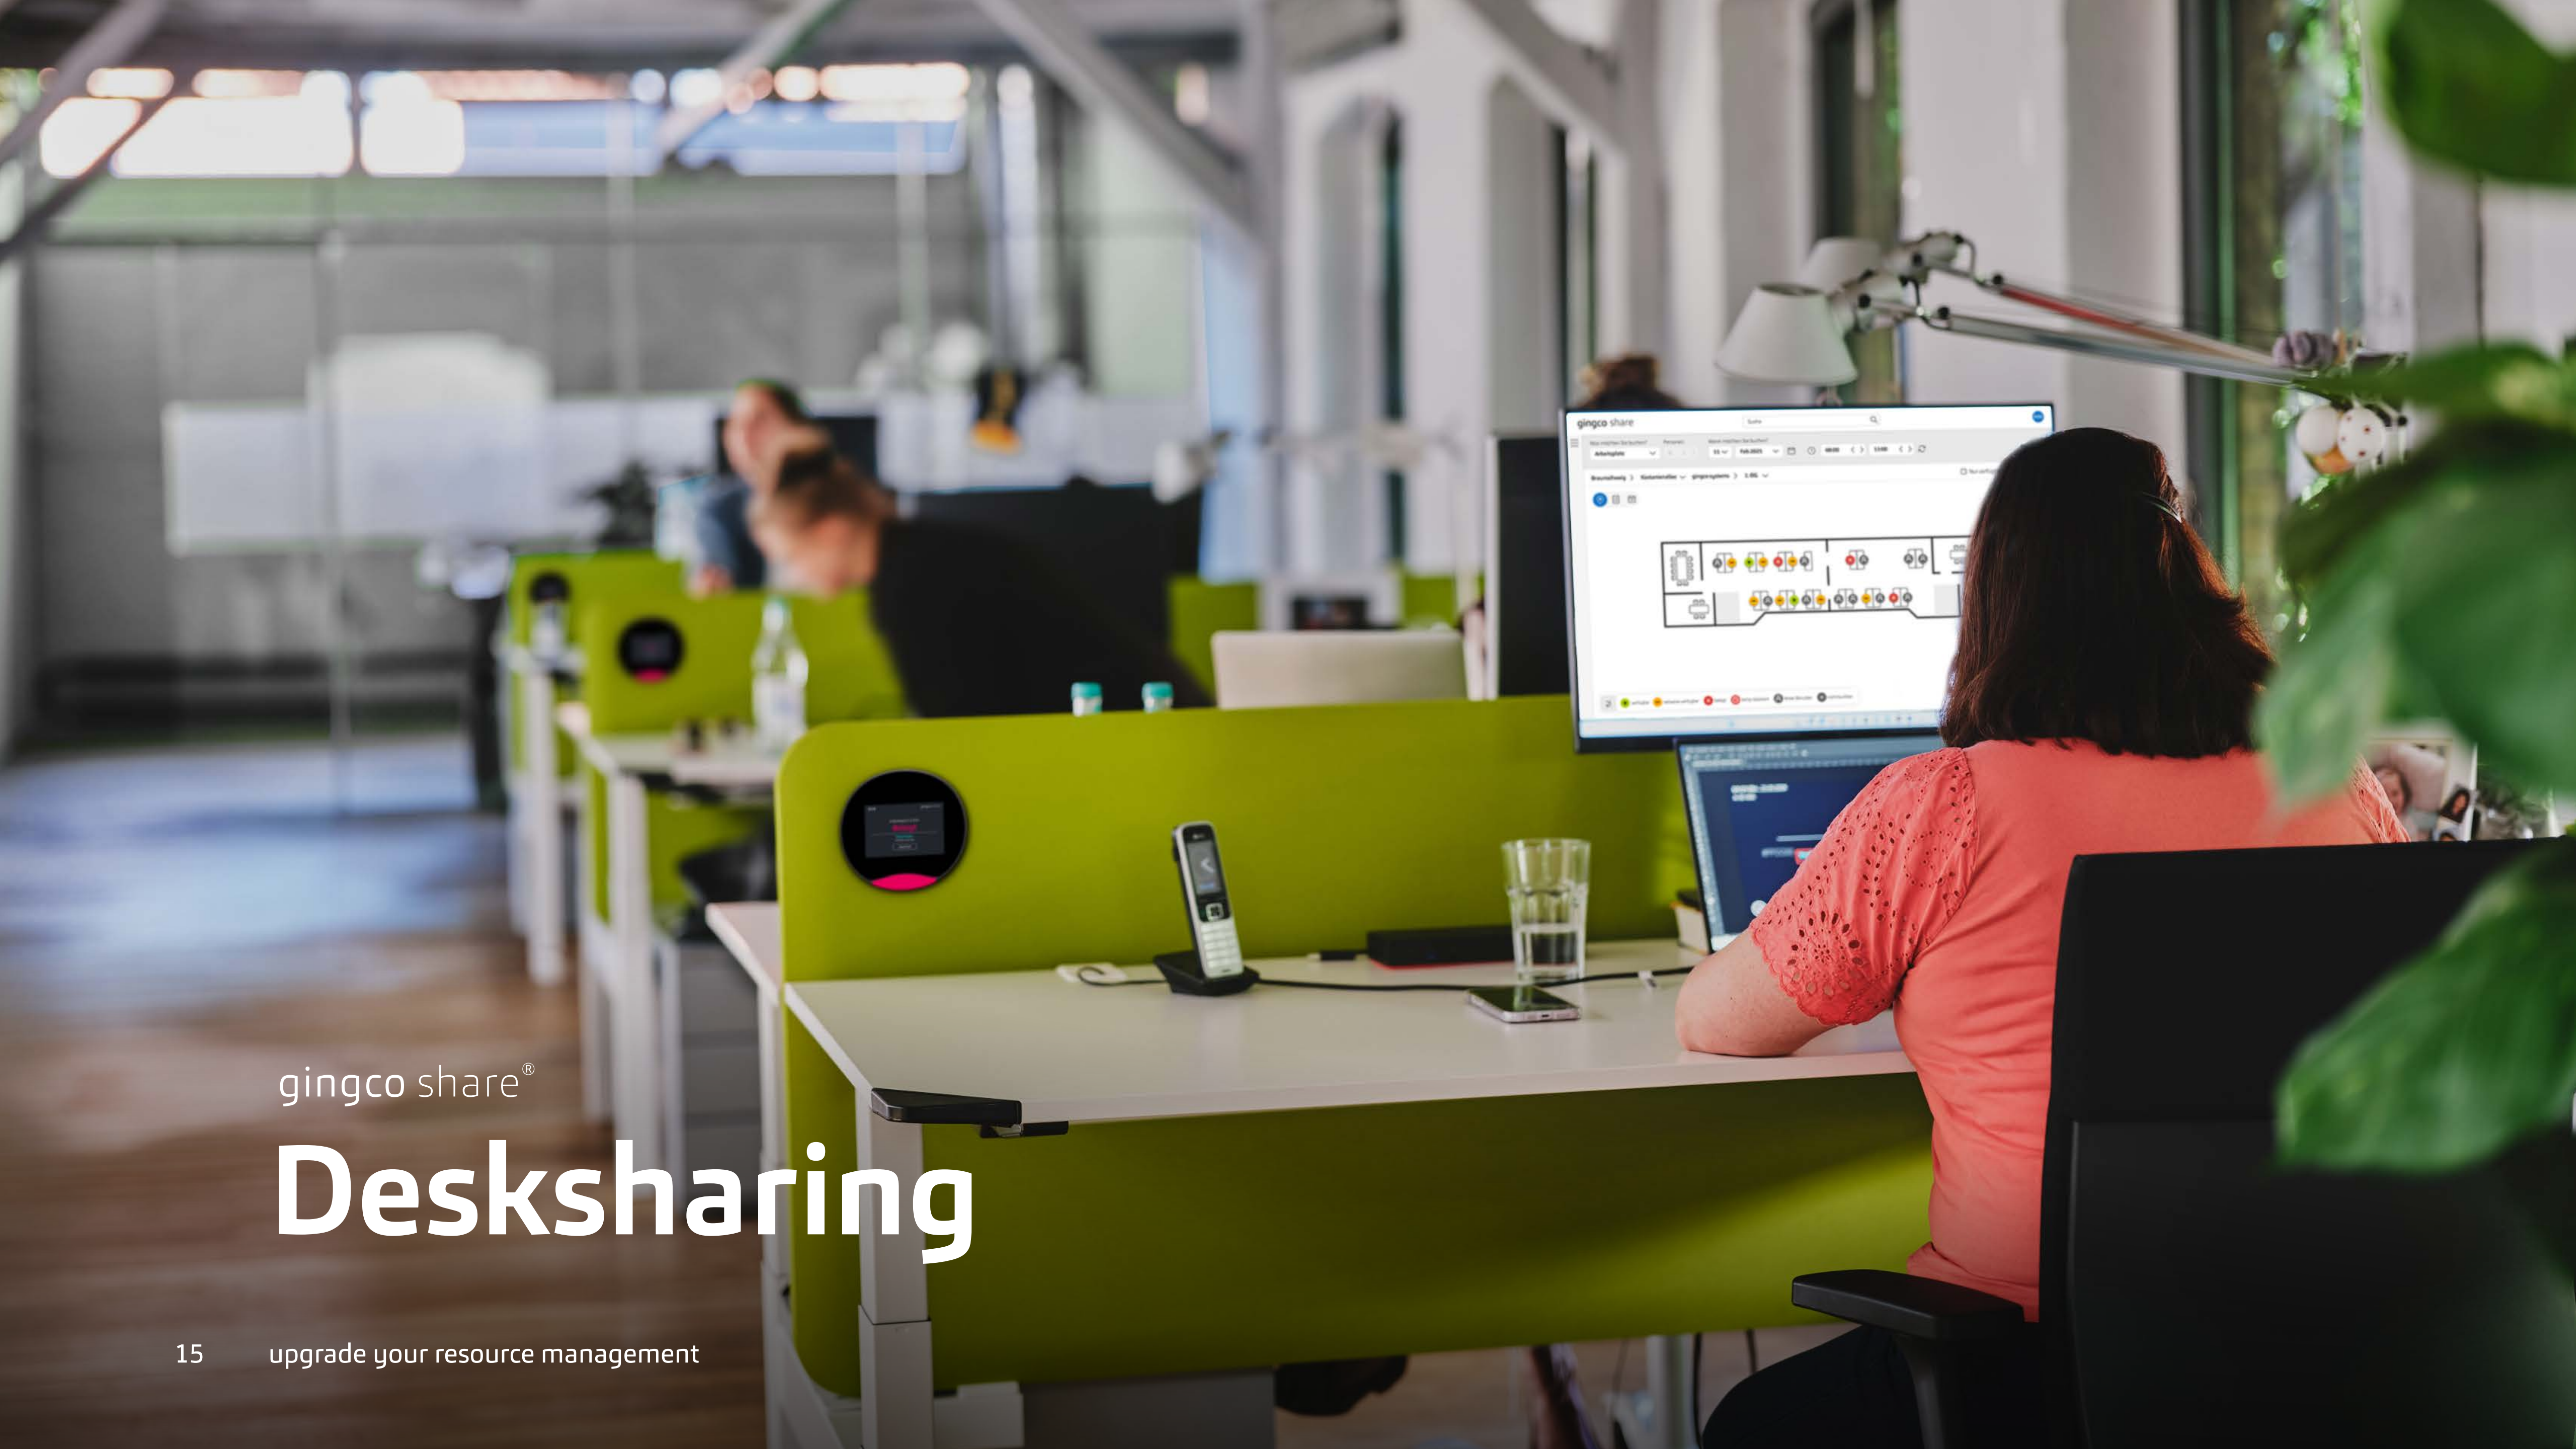

Easily book a room with a single tap – or use your RFID-Card.

Small meeting rooms without door display?

Use one of our numerous booking options, e.g. via QR code scan

Outlook Web Add-in

The bi-directional appointment synchronisation between Gingco Share and Exchange (Outlook 365) offers a future-proof solution for smooth and efficient collaboration.

With this solution, overlapping appointments and booking conflicts are a thing of the past – for optimised, stress-free management of resources and appointments.

Outlook Web Add-in

Booking made easy

Appointments with resource bookings can be conveniently made via a web add-in or by direct invitation. Flexibility and user-friendliness are essential.

Cross-platform and client-independent

Whether Outlook, Microsoft Teams, MTR or Exchange-based display solutions – this solution is compatible with all common tools.

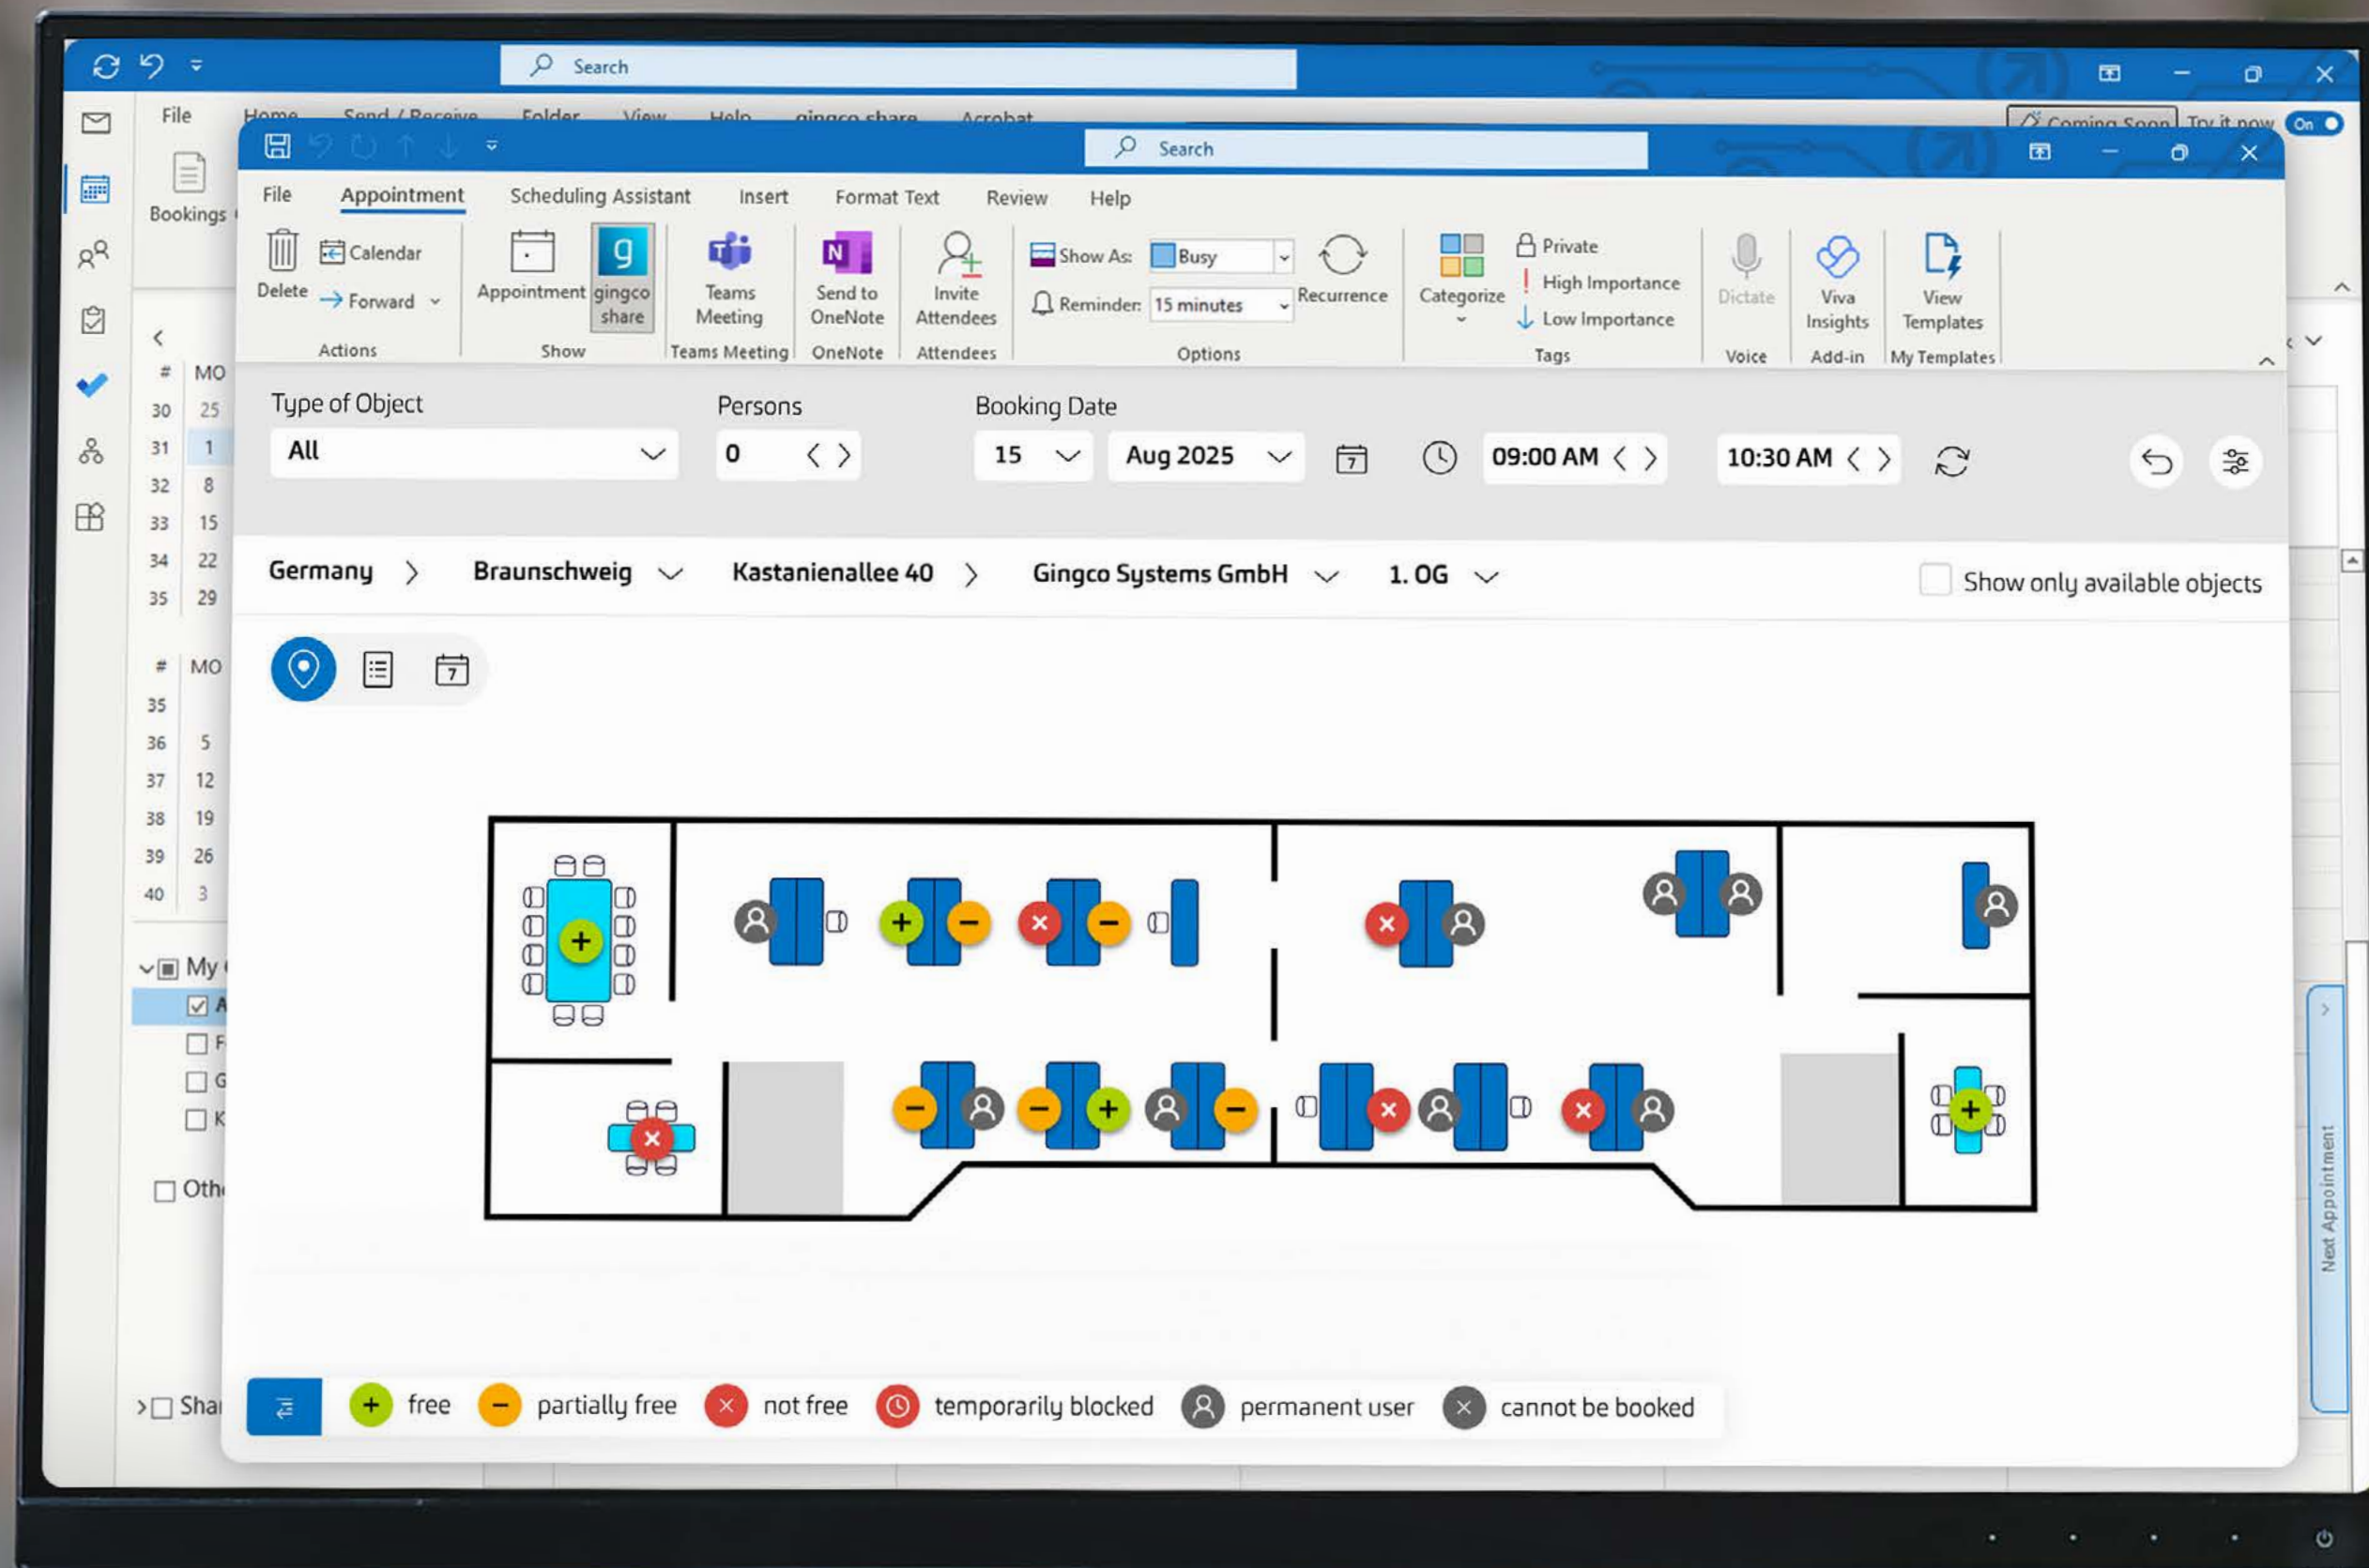

Operating system independent

Whether on Windows, MacOS or Linux, synchronisation works smoothly on every platform.

Seamless integration of existing Gingco Share booking rules

All existing booking rules and availability in Gingco Share remain in place and are automatically taken into account.

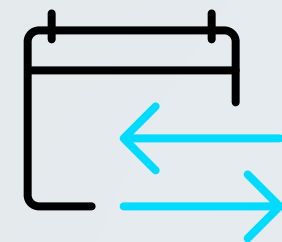

Outlook Add-in

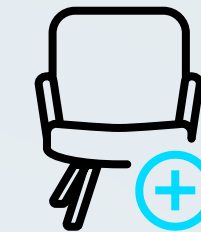

Resource booking directly via Outlook

Check your attendees' availability and send invitations directly via Outlook.

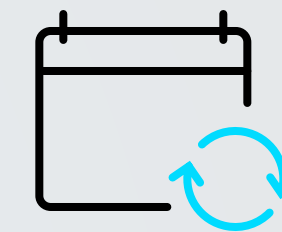

Easy appointment rescheduling

Change your appointment to a different date or time, and the resource booking will be updated automatically in the same step.

Assistance with planning

Give your assistants access to your calendar so they can schedule meetings with resource bookings directly from it.

Synchronisation with building management

All changes made in the web interface of the booking system are synchronised with your Outlook calendar.
